

BeaverIQ

CONSTRUCT. CAPTURE. CONTROL

The fully configurable
Quality & Project
Management platform that
adapts to your workflow.

Your Project Isn't Generic. Why Is Your Software?

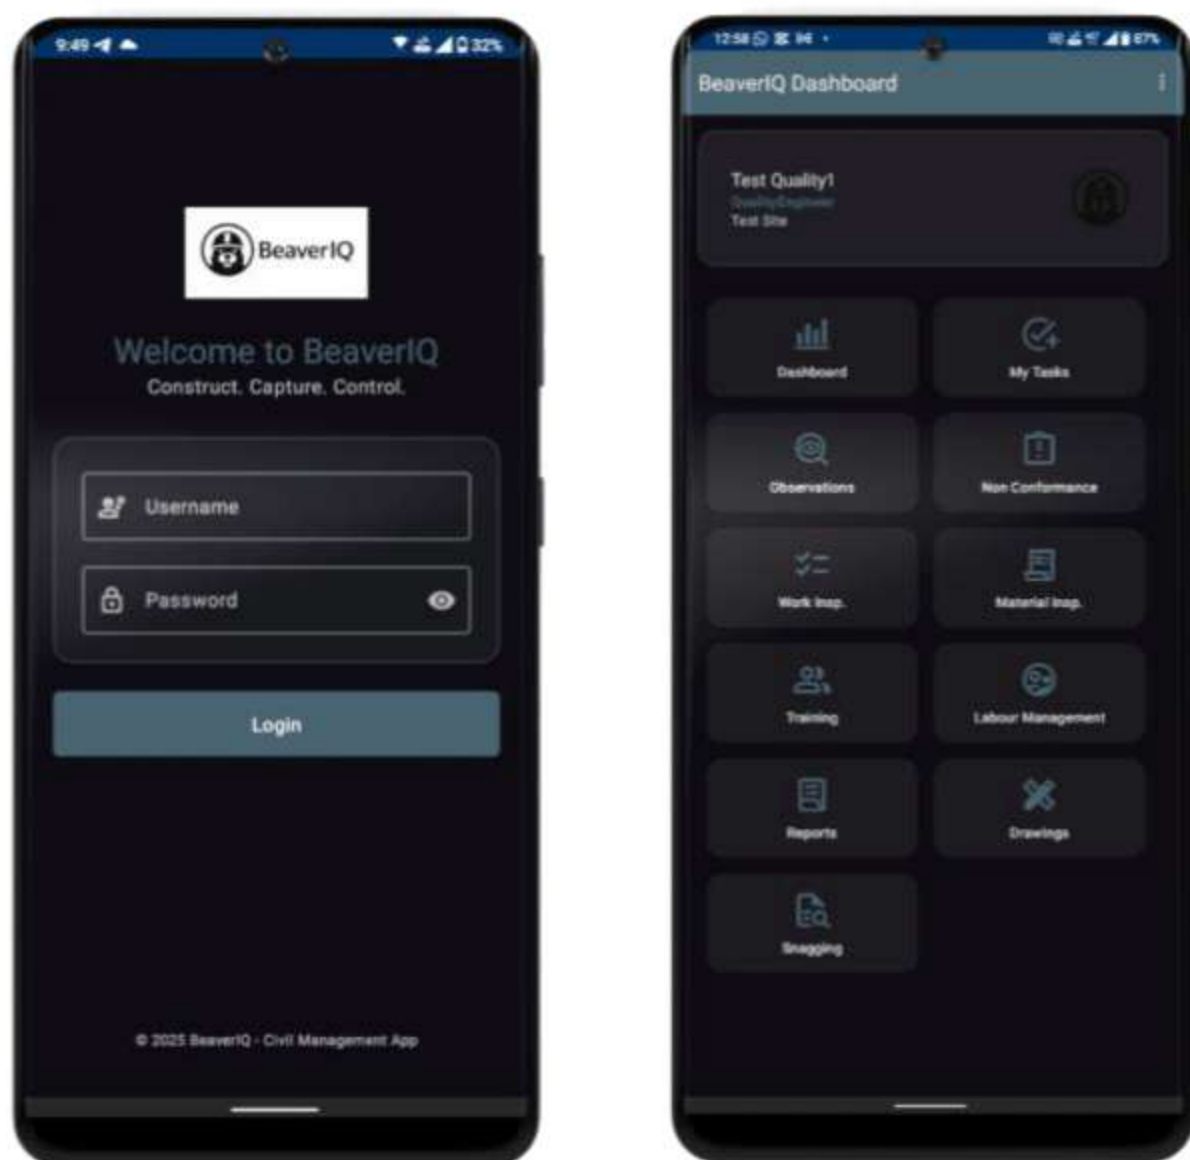

Standard construction software forces you into rigid boxes. You end up managing your most critical tasks on paper and spreadsheets.

BeaverIQ is different.

We built a powerful, flexible platform that gives **you** the controls. Stop compromising and start customizing

With BeaverIQ, you can:

- ✓ **Digitize Any Process:** Recreate your unique paper forms in minutes.
 - ✓ **Configure Your Dashboards:** Track the KPIs that actually matter to you.
 - ✓ **Work Completely Offline:** Never lose data, even in a basement or remote site.
 - ✓ **Automate Your Workflows:** Enforce your quality plan from start to finish.
-

Advanced Modules & Flexibility.

★ 📋 Custom Registers:

Eliminate All Paper Forms. Our most powerful feature. Use the intuitive Register Builder to digitally recreate any paper logbook your site uses—from Concrete Pour Records to Leakage Test Logs.

📊 Configurable Dashboards:

Don't settle for pre-canned reports. You have the power to build your own dashboards with the KPIs and charts you need. Your data, your way.

📄 Material Inspection (MIR):

Ensure quality at the gate. Link material deliveries to your quality tests and auto-calculate results to maintain supplier compliance.

👤 Training & Meetings:

Document and track all on-site training, Toolbox Talks (TBTs), and generate formal Minutes of Meeting (MOMs) for compliance.

The All-in-One Platform for Total Project Control.

Checklists / WIRs:

- Fully digital Work Inspection Reports.
- Create multi-stage checklists (Pre, During, Post) in a single workflow.

Observations & NCRs:

- Capture, assign, and track all on-site issues.
- Measure the real financial impact with our Cost of Poor Quality (COPQ) tracker.

Drawings & Pins:

- Pin issues directly onto your architectural drawings for unambiguous visual communication.

Snagging & Handover:

- A complete, offline-first module for the critical client handover phase.
- Track fixes with photo proof and capture digital client sign-offs.

BeaverIQ
Construct. Capture. Control

Output & Reporting.

The 'Create Checklist' screen shows a 'Waterproofing Checklist'. It has a title bar 'Create Checklist' and a subtitle 'Waterproofing Checklist'. Below the title bar, there are three sections: 'Pre', 'During', and 'Post'. Each section has a list of items with checkboxes. At the bottom, there are three buttons: 'Save as Draft', 'Submit', and 'Cancel'.

Real-Time Dashboards

Unlock management insights with live analytics.

The 'Generate Reports' screen shows options for generating reports. It has a title bar 'Generate Reports' and a subtitle 'Test Project'. Below the title bar, there are four sections: 'Select Report Format' with radio buttons for PDF, Excel, and PPTx; 'Include Modules' with checkboxes for Observations, Non-Conformance Reports (NCR), and Material Inspection Reports (MIR); 'Options' with a dropdown menu and an 'Add Filters (Optional)' button; and a 'Generate Report' button at the bottom.

The 'Reports & Automation' screen shows settings for reports and automation. It has a title bar 'Reports & Automation'. Below the title bar, there are two sections: 'Automation Settings' with toggle switches for 'Auto-generate Daily Report', 'Auto-generate Weekly Reports', and 'Auto-generate Monthly Reports'; and 'Manual Download' with a dropdown menu for 'Daily Progress Report (DPR)' and a 'Download' button.

Instant, Professional Reports

Generate PDF, Excel, and PowerPoint reports for any module with a single click.

Verifiable Documents

Every report is secured with a tamper-proof QR code for authentication.

The Last Construction App You'll Ever Need.

BeaverIQ is the only platform that combines a complete suite of tools with the power to build your own.

- ✓ **Total Flexibility:** Create custom registers and dashboards.
- ✓ **End-to-End Tracking:** Manage everything from MIR to Snagging.
- ✓ **Visual Intelligence:** Pin issues directly on your drawings.
- ✓ **Lifecycle Management:** Use a single checklist for multi-stage activities.

**Stop Adapting to Your Software.
Make Your Software Adapt to You.**
